“For a moment lens caps remained on and we just felt the essence of this beautiful place.”

—Mark Ziembicki,
Lindblad Expeditions-National Geographic Naturalist

National Geographic Orion: An Elegant Ship for Exotic Islands

The sleek and powerful National Geographic Orion sails the Pacific and its surrounding regions on immersive voyages near and dear to veteran Expedition Leader Tom Ritchie. Here, he talks about what makes this state-of-the-art expedition ship the perfect platform for unforgettable island exploration.

It's hard for me to fathom this, but I did my first Lindblad expedition 45 years ago when I was hired to work as a naturalist and lecturer aboard

the *M.S. Lindblad Explorer*. This vessel, with her unique design and abilities, was designated by the U.S. Coast Guard as the world's first Expedition Passenger Vessel. Since that first trip, I have been on close to 700 ship-based voyages throughout my career with Lindblad Expeditions.

So, what is an Expedition Passenger Vessel? A true expedition ship must be relatively small, in order to explore inshore waters, bays and rivers. Often operating in uncharted or poorly charted waters, expedition ships must be self-sufficient,

highly maneuverable, and manned by a highly skilled crew able to handle operations that no big cruise ship would ever attempt. The ships in the Lindblad Expeditions-National Geographic fleet accommodate only 48 to 126 guests; they allow us to explore wild and little-known regions of the world, experience amazing wildlife, and encounter exotic cultures up close. What could be more satisfying than this style of travel for any serious and inquisitive traveler?

From the "Little Red Ship", as *M.S. Lindblad Explorer* was affectionately called, the fleet has grown to 10 expedition ships. While I enjoy traveling aboard all our ships, I have to admit that I have a special place in my heart for *National Geographic Orion*. Elegant with classic nautical lines, I think she is the most beautiful vessel in the fleet. She affords

great comfort in her onboard accommodations and many amenities for only about 100 guests. With her modern navigational equipment, greatly effective stabilizers, and high ice classification, she can travel throughout the oceans of the world from the High Arctic to Antarctica.

Although *National Geographic Orion* was built to handle the extreme conditions of polar waters, she is perfect for exploring the magnificent islands of the South Pacific. With 14 Zodiacs (including a glass-bottomed one), we can land on most any island shore and can also experience the bountiful undersea life by way of snorkeling and SCUBA diving. What I like most about *National Geographic Orion* is her deck space which offers plenty of room to view birds, schools of fish, and other marine life.

Imagine steaming between the exotic islands of Melanesia or Polynesia, and going ashore to explore green, lush, high volcanic isles, as well as barely-out-of-the-sea coral atolls, or diving into the warm, crystal-clear waters and witnessing firsthand the vibrant undersea life. Many of these seldom-visited islands are inhabited by friendly and welcoming people, who are often as eager to meet us as we are to meet them.

I am always eager to return to the South Pacific. Within the vastness of this area are a multitude of cultures and histories, flora and fauna and island types. Exploring these waters is both wondrous and fascinating. I sincerely hope you are able to join us.

EXPEDITION SHIPS MADE FOR THE PACIFIC & BEYOND

On your expedition aboard *National Geographic Orion* or *National Geographic Resolution*, explore secluded atolls, remote bays, gently-winding rivers, and the shallow waters of small islands that larger ships cannot reach. Our best-in-class expedition ships are intimately scaled and luxuriously appointed for maximum comfort, but purpose-built to safely navigate vast expanses of the world's largest ocean. They enable us to explore wild and little-known regions of the world like Micronesia, observe dugongs and other remarkable wildlife, and encounter remote cultures on far-flung Indonesian archipelagos. With a fleet of versatile Zodiacs, as well as a full complement of snorkeling and diving gear, you will have all the tools for exploration above and below the water.

THE MOST EXPERIENCED TEAM

Explore with an expedition team devoted to ensuring our guests have unforgettable experiences. Naturalists to help you spot red birds-of-paradise and understand whale migrations, historians to give context to World War II battle sites, cultural experts to interpret village dances, and, exclusively on our expeditions, a Video Chronicler to create a lasting record of your eventful days.

EXCLUSIVE UNDERSEA PROGRAM

Only with Lindblad Expeditions-National Geographic does an Undersea Specialist dive or use a Remotely Operated Vehicle (ROV) that can descend 1,000 feet to record the dynamic marine ecosystems we explore. Footage of the deep reaches of the incredible coral reefs is shared with guests during our daily Recaps, enabling all to witness the sharks, rays, and brilliantly colored schools of rainbow parrotfish in the watery world below us.

ACTIVE EXPLORATION EVERY DAY

Our itineraries feature a range of activities designed to immerse you in these spectacular environments. Whether you choose to hike in a rare New Zealand podocarp forest, paddle board in a pristine Fiji lagoon, or take to the skies in a helicopter for a bird's eye view of the Kimberley's awe-inspiring tiered waterfalls, you will be able to explore your way, each day. Activities are always included in the voyage price.

Capture Once-in-a-Lifetime Moments With the Help of National Geographic Photography Experts

ASMAT TRIBE IN FULL REGALIA, COLORFUL GALAXIES of fish, and the otherworldly landscape of the Bungle Bungle Range—the regions we explore have no shortage of striking photo subjects. On each expedition, both a National Geographic Photography Expert and a Lindblad Expeditions-National Geographic certified photo instructor (CPI) are available to assist you with everything from camera settings to composition. Because our CPIs are also trained Naturalists they are able to anticipate wildlife behavior and help you capture fleeting moments, such as whales breaching. Every guest—from iPhone camera users to advanced hobbyists—can stand side by side with top photographers, pick up tips in the field, and return home with the photos of a lifetime.

EXCLUSIVE GEAR LOCKER

Thanks to our partnership with camera manufacturer OM System (formerly Olympus), guests have the opportunity to field test top-of-the-line gear during their expeditions. Eager to try a powerful new lens? Researching a new camera purchase? Take advantage of the onboard OM System Gear Locker with our compliments. View a pre-voyage photo webinar and enjoy exclusive gear discounts as well! Ask an Expedition Specialist, or visit expeditions.com/OM

Indonesia & Papua New Guinea

A region lost to time and enveloped in lore, the remote archipelagos we explore are true paradises both on earth and below the surface of their translucent waters. It's known as the global center of marine biodiversity—a mecca for snorkelers and scuba divers. Above the sea, the region is equally fascinating, from the giant monitor lizards of Komodo Island and the ancient spires of 9th century Borobudur Temple to the intricate ikat textile weavings of Watublapi.

Australia & New Zealand

Neighbors, yet wholly distinct, Australia and New Zealand offer many thrilling discoveries along their coastlines. The wonders of the Kimberley plateau on Australia's remote northwest coast include an emerald rainforest and deep gorges, while an exploration of New Zealand's North and South islands reveal special places not reachable by land, like a rare coniferous podocarp forest.

Our expeditions in Australia and New Zealand also offer opportunities to venture a bit beyond. From Australia, head to Indonesia's remote islands for exceptional snorkeling and the opportunity to see Komodo dragons; and set a southern course from New Zealand for the wildly beautiful and rarely visited sub-Antarctic islands with their millions of penguins, thousands of seals, and flora and fauna found nowhere else in the world.

King George Falls; Gwion Gwion rock art; Salt water crocodile, Hunter River; Cathedral gorge, Bungle Bungle.

Daily Expedition Report

*Our fleet navigates the world in search of adventure.
These are the stories they bring back.*

RANGIROA, GREEN LAGOON, AND THE AQUARIUM 4/26/2022 | NATIONAL GEOGRAPHIC ORION

By Javier Cotin, Naturalist

Sometimes the stars truly align, and today was one of those days. A last minute destination change resulted in a once in a lifetime experience. This is how the story goes.

Our original destination was the Blue Lagoon in Rangiroa. Due to unexpected circumstances, destiny wanted us to go somewhere else.

That location was the Green Lagoon in Rangiroa. Coconut trees surround this beautiful sandy beach, one of the two entrances to Rangiroa.

The Green Lagoon was also the destination of the traditional voyaging canoe, Fa'afaite. Fa'afaite left Tahiti four days ago with a crew, navigator trainees, and Punua, a Master Mariner.

During the morning, the Fa'afaite entered Rangiroa with its beautiful silhouette marked by two sails. The crew made its way to the white sandy beach. Tua, our cultural navigator and naturalist, greeted the crew in Polynesian. Punua and the crew chanted back. Hakus and heis were exchanged (ornamentation for the head and shoulders made by vines), and right in front of our eyes, a beautiful ceremony occurred.
